MW Update MS3 Sustainment

6 August 2003

BRIEF

- **PURPOSE:**

  To provide status of MS3 Sustainment Middleware Problem Reports (PRs) and high visibility Change Request (CRs).

Summary Of MW MS3 Sustainment Problem Reports (PRs)

All MW PRs are currently implemented, waiting validation

- **PR 3121**   **Emergency**   **25 Jun 03**
- **PR 3097**   **Urgent**   **11 Apr 03**
- **PR 3151**   **Urgent**   **25 Jun 03**
- **PR 3158**   **Urgent**   **25 Jun 03**
- **PR 3162**   **Urgent**   **15 Jul 03**
- **PR 3177**   **Urgent**   **15 Jul 03**

Summary Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

All MW PRs are currently implemented, waiting validation

- **PR 3178**   **Urgent**   **15 Jul 03**
- **PR 3179**   **Urgent**   **15 Jul 03**
- **PR 3149**   **Routine**   **25 Jun 03**
- **PR 3163**   **Routine**   **15 Jul 03**
- **PR 3165**   **Routine**   **15 Jul 03**

Summary Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

All MW PRs are currently implemented, waiting validation

- **PR 3146   Urgent   15 Jul 03 Shared PM LIS**
- **PR 3171   Urgent   24 Jul 03 Shared PM LIS**
- **PR 3137   Routine   15 Jul 03 Shared CSC**

Emergency Problem Report 3121

- **Problem: Middleware does not always receive the "OSC" files from SARSS1, resulting in missing transactions**

- **Impact: National Level (CCSS) does not receive all the supply nor the End of Day (EOD) transactions, resulting in erroneous inventory adjustments**

- **Resolution: Middleware will utilize the "F09" file along with the "OSC" file to determine all supply and EOD transactions required for the National Level**

Summary Of MW MS3 Sustainment High Visibility CRs

Currently implemented, waiting validation

- ## **CR 2159 Urgent 24 Jul 03 AMC/ABO Directed**

Change Request 2159

- **Problem: The means to stop providing O & M credit for turn ins to certain Army customers**

- **Impact: Saving AWCF dollars**

- **Resolution: Middleware, based upon a new "stopcredit" table containing designated SARSS1 RICs, will input a Return Advice Code "1Y" (no credit) in all their Army customer turn in transactions**

MW MS3 Sustainment Research and Assistance

- **MW receives request for assistance from DA, AMC, MACOMS, IMMCs, OPLOCs, CDAs and field users**

- **Research, problem resolutions, issues and assistance requests provided by MW equal 80 – 100 monthly**

Detail Of MW MS3 Sustainment Problem Reports (PRs)

- **PR 3097   EOD invalid zero balances were caused by invalid input data for the manager code field on the ABF line from SARSS. The invalid data caused MW not to read any further on the file.**

- **PR 3151   MW was allowing DICs D8Z/D9Z DS/RX transactions to pass to CCSS. These gains/losses are for "pre positioned" war reserve stocks and CCSS does not reflect DS/RX inventories.**

Detail Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

- **PR 3158   MW was changed to not modify the Signal/Fund Code of follow on AWCF replenishment transactions, which were established prior to conversion.**

- **PR 3162   MW was modified to create "A6J" transaction, from SARSS incoming AE_, when RP 52-53 equal "GJ" and pass to CCSS.**

- **PR 3177   MW was modified to update RP 51 to "M" on a D6N when RP 52-53 equal "G4" and RP 70 was not numeric.**

Detail Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

- **PR 3178   MW was modified for DAD, D8D and D9D transactions to block the DAD, change the D8D/D9D to a D8F/D9F, create EOD, when the OP equal "E".**

- **PR 3179   MW was modified to include an additional edit to PR 3178. When the first character of the MATCAT equals "H" set RP 4-6 to "B17".**

Detail Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

- **PR 3149   MW modified to set RP 67-69 to equal blanks when creating a Post/Post A0A FD from incoming SARSS DGA transaction.**

- **PR 3163   MW modified to set RP 51-53 to equal "MGZ" when SARSS incoming A6_ denial document number matches document number on MW RON table created at conversion.**

Detail Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

- **PR 3165   MW modified to include the "OSC" file for input when checking BSS transactions, the same as with the "080" file.**

- **PR 3146   MW created a new index to receive a DIC BEW from SARSS/CCSS RECON and generate a DIC AC1 to CCSS . This provides CCSS a response to the RECON when SARSS has no record.**

Detail Of MW MS3 Sustainment Problem Reports (PRs) (Continued)

- **PR 3171   MW modified to convert an incoming SARSS AE_ with RP 7 equal "c" or "m" to an AC1 regardless of the SARSS RIC.**

- **PR 3137   MW modified the EOD DZK for an incoming D6X transaction to convert the DIC from D6X to D8F in RP 54-56 of the EOD DZK.**
